

Ultra High Purity Plus Reverse Osmosis

Countertop 4 Stage Water Filter System with Alkaliser

PLEASE READ CAREFULLY BEFORE ATTEMPTING MAINTENANCE

System Assembly Diagram 1

Labelled Components

- | | |
|---|---------------------------------------|
| 1 | Carbon Pre-Filter <i>Made in USA</i> |
| 2 | RO Membrane <i>Made in USA</i> |
| 3 | Carbon Post Filter <i>Made in USA</i> |
| 4 | Alkaliser Filter <i>Made in USA</i> |
| A | Diverter |
| B | 1/4" white tube FOOD GRADE |
| C | Pressure Gauge |
| D | 1/4" black tube FOOD GRADE |
| E | 1/4" blue tube FOOD GRADE |

Step by Step Maintenance

Before attempting maintenance please ensure you have switched off the feed water to your system.

- Remove the cover by compressing the clips at each end of the unit.
- Taking note of the direction indicated on the filter label, unscrew the Carbon Pre-Filter and dispose.
- Unscrew the Carbon Post-Filter and re-install it in the position of the Carbon Pre-Filter. *The Carbon Post-Filter has only been used as a polishing filter, hence it can be re-used as the Carbon Pre-Filter.*
- For instructions on how to replace the RO membrane* please see Page 2.
- Install the new Carbon Post-Filter by inserting the new filter into the existing head assembly.
- To replace the Alkaliser Filter, remove the stem elbow (with blue tube inserted) from both the inlet and outlet of the filter cartridge - pushing on the filter's collet whilst pulling the stem elbow. To install the new filter; if necessary remove any dust plugs and re-attach the stem elbows with the blue tube inserted.
- Flush the system before use; with the blue tube feeding to a drain, run water through the system for a few minutes. Dis-colouration and aeration may occur - this is normal and occurs when the non-toxic carbon fines and oxygen are flushed from the new cartridges.

* Depending on water quality and usage, your RO Membrane should last 3-6 years. Your pure water quality can be tested with a conductivity meter measuring total dissolved solids (TDS) from the pure water outlet - this will indicate the rejection of contaminants ratio. Purchase a TDS Reader or alternatively a complimentary service is available at either of our showrooms listed below.
